Embrace me beauty  
I'm dying outside your door  
With you the world's explained  
Without you it comes back for more  
I offer to fall dead upon the floor  
And it keeps coming back for more

I stumbled and crawled these streets  
With the people passing by  
I never knew how to act  
I never knew how to meet their eyes  
And I couldn't tell you the reason why  
I just wanna light up the sky

But I am not afraid, greed don't pay  
You're there when she's willing  
And you stay as long as you may

Embrace me beauty  
I've gone through it all again  
The things I lived and died for  
Now I can't begin to understand  
I had my love slide out of my hands  
I met the stranger in my friends  
Embrace me beauty
