His life has been stolen from him
I've got it perfectly right, it was a bull's-eye
It is time for me to authorize someone to do it one
more time
You surrender without resistance Joy

I am God, yet you don't know It's a shame
You'll bring the stuff, then I will be glad to show you the
way
How to be God

It will make a blind man blush, so why don't you start
with keeping your mouth shut
You will call upon the mighty, and I will call upon you to
do a service for me
He comes in now and then to entertain the kids But
something is wrong
That's not a part of the act
He will soon carry out the ultimate fraud of all time

I am God, yet you don't know It's a shame
You'll bring the stuff, then I will be glad to show you the
way
How to be God

I am God, yet you don't know It's a shame
You'll bring the stuff, then I will be glad to show you the
way
How to be God
