Now that you've started something  
How can you see it through  
Caught up and calling, falling through  
Taken a certain something that's fallen from our lives  
Boy I can see it in your eyes

Do you know where you're going?  
Do you know where you go?  
There's no way of knowing  
If you let him go

If there's soul where you're going  
If there's soul let it show, I know where you go  
You're gonna make out alright  
Or break out alright, break out alright

All that you wanted baby is right in front of you  
Is my message getting through to you yeah, yeah  
True communication is always hard to find  
When you've left your words behind

Do you know where you're going?  
Do you know where you go?  
There's no way of knowing  
If you let him go

If there's soul where you're going  
If there's soul let it roll, I know where you go  
You're gonna make out alright  
Or break out alright

Make out alright, make out alright  
Make out alright oh, make out alright  
Make out alright

Do you know where you're point?  
Do you know where you go?  
There's now way of knowing  
If you let him go

If there's soul where you're going  
If there's soul let it so

I know where you're going  
You're gonna make out alright

Do you know where you're point?  
Do you know where you go?  
There's now way of knowing  
If you let him go

If there's soul where you're going  
If there's soul let it roll  
I know where you're going  
You're gonna make out alright  
Or break out alright

Make out alright, make out alright  
Make out alright, oh make out alright  
Make out alright

Oh, make it in the morning  
Make out all night  
Make it, make it, make it  
Make out alright

Oh, make it in the morning  
Make out all night  
Make it, make it, make it  
Make out alright

Make out alright, make out alright  
Make out alright, make out alright  
Make it, make it, make it  
Make out alright

Make it, make it, make it  
Make it, make it, make it  
Make out alright

Make it, make it, make it  
Make it, make it, make it  
Make out alright

Make it, make it, make it
