I'm not always there
Walking by your side
But I still see you
When I close my eyes
You're within my heart
I reach out my hand
I want to touch your face
Can't you understand?

We are meant to be
There's no doubt we're meant to be
You and I are truly, truly amazing
We are meant to be.

There was once a space
Deep within my soul
Didn't really know
You would make me whole
We cannot let go
Never break the chain
That links your heart with mine
Love is here again

We are meant to be...

I think back over time
You've always been on my mind
I didn't realise then
Now I know from beginning to end

We are meant to be....
