In silence we're swayed
A gesture, a wild sashÃ©
Can make your today
And then take it all away

They made us this way
For what they can never say
Sent us on our way
It's useless to make them pay

Holding ground
Holding ground
Holding ground
Holding ground

Just live for today
Least that's what they try to say
They said that we'd pick
Then they'll take your pain away

Holding ground
Holding ground
Holding ground
Holding ground

So much for today
So much for the days of men
So much is the son
He'll just make it fade away

Holding ground
Holding ground
Holding ground
Holding ground
