You can have Washington, I'll take New Jersey  
You can have London but I want New York city  
I should get Providence, I've got a job now  
Los Angeles obvious that's where you belong now

You can have Africa, Asia, Australia  
As long as you keep your hands off Cafe Pamplona  
We can split Germany right down the middle  
You'd hate it there anyway, take Berlin and we'll call it  
even

You can have all of the carry-on baggage  
I'll trade the saskia jokes for the alphabet language  
On special occasions, we'll split between parents  
Who forced us to hate them on alternating weekends

You call it over and I call you psycho  
Significant other just say, we were lovers  
And we'll call it even, we'll call it even

I am the ground zero ex-friend you ordered  
Disguised as a hero to get past your borders  
I know when I'm wanted, I'll leave if you ask me to  
Mind my own business and speak when I'm spoken to

I am the tower around which you orbited  
I am not proud, I am just taking orders  
I fall to the ground within hours of impact  
I hit back when hit and attack when attacked

You get Route 2 between Concord and Lexington  
I want mass ave from the square to my apartment

And if we should meet through some  
misunderstanding  
I'll be very sweet, very patient and forgiving  
Now get off my side of the state

And if we should see one another in passing  
Despite these techniques there is sometimes no  
avoiding  
There must be some kind of mistake

We'll raise high our white flags and bow heads and  
shake hands  
Declaring the land, we're on un-American  
We'll call it even, we'll call it even

I am the tower around which you orbited  
I am not proud, I am just taking orders  
I fall to the ground within hours of impact  
I hit back when hit and attack when attacked

And I am an accident waiting to happen  
I'm laughing like mad as you strangle the captain  
My place may be taken but make no mistake  
From a little black box, I can say without shame

That you've lost, that you've lost  
Do you know what you've lost?

So take whatever you'd like, I'll strike like the states on  
fire  
You won't sleep very tight, no hiding no safe covers  
Make your bed and now lie just like you always do  
You can fake it for the papers but I'm on to you, I'm on  
to you

Take whatever you'd like, I'll strike like the states on  
fire  
You won't sleep very tight, no hiding no safe covers  
Make your bed and now lie just like you always do  
You can fake it for the papers but I'm on to you, I'm on  
to you  
I'm on to you, I'm on to you

Amanda, you're telling me a fairy tale
