Oh I will never forget the first night we met  
Was love I was searching for  
My heart beat faster and faster, oh so much faster  
Faster than it did before

We'll be together, and love forever  
Nothing can change our destiny

I knew the moment I kissed you, couldn't resist you  
Together we belong  
And then I knew in that moment just what this glow  
meant  
True love had come along

We'll be together, ever and ever, close to my heart  
You'll always be.  
We'll be together, and love forever  
Nothing can change our destiny
