It's one of those days  
When nobody's home  
Everyone's here  
But you're all alone

It's one of those nights  
Where everyone's cold  
But they're standing on ice  
And it's all your fault

I feel this moment  
Has been lasting for days  
Without even blinking  
I've seen a million faces  
Change the way they look

Everything you wanted you've gotten  
Your whole life  
But all you want is just to see  
Just wait follow the sounds  
They'll love the way  
You make it sound  
It sounds the same to you and me  
But now you've got everything

Everything you wanted you've gotten  
Your whole life  
But all you want is just to see

Wait follow the sound (follow the sound)  
They'll love the way you make it 'round (love the way  
you're 'round)  
It sounds the same to you and me (sounds the same to  
me)  
And now you got everything
