Everything in this life is going to hell
But I'm feeling well
They say misery loves company
And I'm having a party
Walls come crashing down around me
Delicate state of instability
The best thing there is to get me through
Is to know the same thing's happening to you
I've got a secret just like you I'm sure
We'll make the suffering of this whore of a world a bore
Fuck yeah
And when you finally accept
We're in this mess till our deaths
Face the beast or turn your head
Love life till your dying breath
Meet your demise unafraid
To the unknown you will fade
Find peace in chaos and pain
It's time turn on the insane
