Whenever life get you down, Mrs. Brown,  
And things seem hard or tough.  
And people are stupid, obnoxious or daft,  
And you feel that you've had quite enu-hu-hu-huuuuff!  
Just - re-member that you're standing on a planet that's  
evolving  
and revolving at 900 miles an hour,  
It's orbiting at 19 miles a second, so it's reckoned,  
the sun that is the source of all our power.  
The Sun and you and me, and all the stars that we can  
see,  
are moving at a million miles a day,  
In the outer spiral arm, at 40,000 miles an hour,  
of the Galaxy we call the Milky Way.  
Our Galaxy itself contains 100 billion stars,  
it's 100,000 light-years side-to-side,  
It bulges in the middle, 16,000 light-years thick,  
but out by us it's just 3000 light-years wide.  
We're 30,000 light-years from galactic central point,  
we go round every 200 million years,  
And our galaxy is only one of millions of billions  
in this amazing and expanding universe.

The universe itself keeps on expanding and  
expanding,

in all of the directions it can whizz,

As fast as it can go, at the speed of light you know,

twelve million miles a minute, and that's the fastest  
speed there is.

So remember, when you're feeling very small and  
insecure,

how amazingly unlikely is your birth,

And pray that there's intelligent life somewhere up in  
space,

because there's bugger all down here on Earth
