"I Will Survive"

Visit "[I Will Survive](#)" on MotoLyrics.com

You like to think that you'll be the only one who
understands me with it
And you tell everyone that I can't live without you even
for one day
But who gave you the right to talk about the way I feel
so deep inside
Now I realize you were never mine, you were never
right
Baby you will find
I will survive
I'm gonna make it through
Just give me time
I will get over you
I will survive
No matter what you do
Just need to see I will get over you
Cause baby we'll survive
Cause baby we'll survive

What makes you think that I don't see the way you
made a fool of me
To laugh behind my back ???
Now I realize you were never mine, we were never right
Baby you will find
I will survive
I'm gonna make it through
Just give me time
I will get over you
I will survive
No matter what you do
Just need to see I will get over you
Cause baby we'll survive

I will survive
I'm gonna make it through
I will survive
I will get over you
Cause baby we'll survive
