Are you coming to your nightmare tonight  
The word is out that you're ready to try  
Don't bring your partner...you just come alone  
Tell your folks you're not coming home

Who's gonna notice as you walk on by  
Who really cares if you live or die  
Who's gonna miss you if you walk on by  
Have you ever tried suicide?

Goodbye is all you can say  
You don't wanna see another light of day  
You're feeling dirty...like you've been used  
Nobody ever really loved you

Who's gonna notice as you walk on by  
Who really cares if you live or die  
And who's gonna miss you if you walk on by  
Have you ever tried suicide?

Write a letter...but write it in blood  
You're all alone...there is no God  
You're feeling scared, stop running away  
Nobody wanted you anyway

Who's gonna notice as you walk on by  
And who really cares if you live or die  
And who's gonna miss you if you walk on by  
Have you ever tried suicide?

Well take my hand, come dance with me  
Take just one step and you'll be free  
You'll see no lies in these blood red eyes  
You ain't gotta dream when you're dancing in fire

Have you ever tried suicide? (6x)
