Oh Oh Oh Oh

Hush it's not safe to talk

That terminal could be switched on

The IBMs could monitor

And flag the things we say

Make sure you keep your cover up

And cover up your TV

When you call me

And make sure you watch your TV every day

And take nothing for granted

It's a war always remember

It's like holding back the ocean

Trying to hold onto your mind

Don't forget the reason

Why you started in the first place

It's a struggle like no other for the fate of humankind

[repeat]

And take nothing for granted

It's a war always remember

It's like holding back the ocean

Trying to hold onto your mind

Don't forget the reason

Why you started in the first place

It's a struggle like no other for the fate of humankind

The fate of humankind

[x4]
