

Animaniacs "The Planets"

It's time to tour the planets that make up our solar
system, come on
The closest to the sun is the planet Mercury

Next the shrouded planet Venus
Is as covered as can be

The Earth is next, we call it home
Let's hope it stays that way

And then there's Mars, it's really red
What more can I say?

The gassy planet Jupiter's
As big as planets come

Then there's Saturn with its mighty rings
Made up of tiny crumbs

We travel on to Neptune
That's a gassy-freezy ball

And cold and tiny Pluto
It's the furthest one of all

Well, there you go, that's our solar system
You forgot Uranus, goodnight everybody
