Words searing me breaking the silence actions
solidified intentions breeding misfortune save this
tortured soul end this pain killing me inside so tired of
this life just take me darkest secrets haunt me giving
me a notion I'm hopeless losing the fear that I'm dying
embrace this broken soul with you forgiveness make
me a prodigy of my decisions I am eternal I am eternal
just help me mend this sacred heart still beating
product of sacrifice I am eternal I will remain show this
path make me enlightened I am eternal no one shall
ever bring me down words tiring sorrow filling fall into
dust.
