holding on, holding on
oh, love take my hand just take my hand
oh, to feel, to feel real
holding on, shadows fall around me
trust in me please, trust in me
oh to feel, to feel real
what's in a name it's more than we will ever know
just look at our eyes can you even tell what's on our
minds
if only the face could tell a story
holding on, holding on
quiet it seems show your face please, show your face
oh to feel, to feel real
what's in a name it's more than we will ever know
just look at our eyes can you even tell what's on our
minds
if only the face could tell a story
