In raging fire we ruin the light
Reveal the magic and the newborn might
We are the slayers of false and weak
Beyond the horizon, beneath the shades
A total genocide you shall obey

Bring forth the fury and endless pain
Ride for glory in victorious flames
Your life is descending, silent end
Stormy legions of destruction
We are the horde of devastation

Defending the throne - hellfire horde

Death metal darkness - devastation will forever be
Death metal darkness - we are the masters of
immortality

In raging fire we ruin the light
Reveal the magic and the newborn might
We are the slayers of false and weak
Beyond the horizon, beneath the shades
A total genocide you shall obey

Defending the throne - hellfire horde

Death metal darkness - devastation will forever be
Death metal darkness - we are the masters of
immortality
