Go Fuck Your Ass Off

Watching the big boys cleaning their hands

Playing with new toys, the old ones are back

Sliding down the Adam's ass to get them what they
need

She will do just anything to get them clean

They want to push you down

squeeze your brain

They want to push you down treachery

By the soul to suffer and pain

They live in a dream world of dope and dust

A glittering rose of gold of lust

The demand of junk is getting strong

Let's have some fun while we're young

Don't mess with my life

Just keep it to yourself

I know what you have in the box on the shelf

Using the small kids to selling to his friends

The hype is you know that it still a trend
