

The Explosion

"Music"

Visit "[Music](#)" on MotoLyrics.com

When all we have is music
You're a little more like me
We've come too far to lose it
This state of imagery
When nothings real and nothings wrong
That's my favorite part to see
We dance around and we sing our songs
There's nothing like the wings of an angel
When all the stars are glowing
Wide awake but deep in a dream
Unconscious of any motion
Save for the movement in me
And I know that this will always be
Our perfect in-between
So maybe somehow we can help them see
There's nothing like the wings of an angel
Entranced in sweet obsession
Such a complete expression of myself, myself
Cause I know where I am planted
Deep in a love transcending everything, everything
When all we have is music you're a little more like me
