

The Explosion

"My Inspiration's Gone"

It's quick and easy to speak about girls
Or fuck the system with canonical notes
Whatever you've written so less less inspired
This song explains that once when I alone with my
guitar
I wrote just obscene melodies
And a lyric that could be thought by little mice
I hope this song'll be free, forever
And you've tried it once in a life
My inspiration's gone, again yeah...
I want to change and dance with you
I've heard my best old songs
They sound me so perfect
A critic so impartial
It's enough a girlfriend to crash all my men
This metal like an anthem... Again
