Can I get a recipe for this thing called love
So I can return it where I bought it from
No longer do I see use for it
Our time is up I am clocking our finish
Girl just give me space more than distance
So [?] like we never existed
Sheltered [?] how we're gonna fix this
This how our heart breaks
When this song comes on
I hope it makes you hide
Run to a corner cover your ears and hide
Girl I hope the world stuck heavy inside
And this song plays over and over in your mind

This ain't a love song [repeats]
There is no happily ever after
This ain't a love song [repeats]

[?] I don't wanna have something that won't succeed
If love is supposed to hurt tell me why do I bleed
Girl I feel like a slave I wanna be free

Instead of fire and let this love burn
I wanna run away and never return
I don't want you girl it's time to learn
I've been feeling the pain now it's your turn

When this song comes on
I hope it makes you hide
Run to a corner cover your ears and hide
Girl I hope the world stuck heavy inside
And this song plays over and over in your mind

This ain't a love song [repeats]
There is no happily ever after
This ain't a love song [repeats]
