"One Ten & Hundred"

What the fuck, tell me what was wrong
And why the fuck did it take that long
Where were your "Law and Order"
When they started their attack
Seems the majority of this country
Don't mind racial brutality
The victims are almost
Homeless, punk or black black black black

First one, then ten, then hundred people dead (4x)

Forgetting facts and motivation
Here's the latest calculation
Stupid people tell the mass
"Right" is equal "Left"
Apart of spreading lies and telling lies
Same time these people criminalize
Courage, rights, protest, too
Derision of the dead dead dead dead
