Always out in the system 9 to ten  
Saw a picture made me turn around  
You can tell if you are with her  
Cause they are not aloud  
You are on two strikes don't let me down  
Says you wanna girl make her fall in love  
But you didn't know what to do when you got her  
You are too busy being the man who attracts her  
When are you gonna be responsible for your actions  
I wonder if you knew that I will do it all for you  
If you had a clue... you make it all for me  
Stay stay  
It's been selfish when you play I can't help it  
... time get your... together  
You want me to wait... selfish and you play like you  
can't help it  
You want me to wait... I remember when we first met  
you seemed so innocent

Never had a problem you were the perfect gentleman  
Tell me where my eyes close form the beginning  
When you are doing your dirt from the beginning  
Is hard for me to talk I am too...  
What they say it's true I don't know what I am missing  
I am just following my intuition why do you put yourself  
into crazy  
Position  
I wonder if you knew that I will do it all for you  
If you had a clue... you make it all for me  
Stay stay  
It's been selfish when you play I can't help it  
... time get your... together  
You want me to wait... selfish and you play like you  
can't help it  
You want me to wait
