

The Faint "The Passives"

Visit "[The Passives](#)" on MotoLyrics.com

Left eye spins in circles, passives line the rail
They get no satisfaction from the electro-static breaks
A beat can't cut the passives loose they're afraid what
we will say
No harm is done when you try it then hide

Parts moving, keep moving
A cool collected life is a safe move
You heard that
You're unsure but its clear to us
Come to terms, you're alone here observing
Every time you go out you observe
Walk past collared passives
Don't look toward their eyes
It adds to their discomfort
Shows there's some confidence, they miss
