In everdecreasing circles
To the center of the sphere
We move to the middle
To answer the riddle
And finally
disappear [x29]

In everdecreasing circles
We spiral to the core
We move to the middle
To answer the riddle
Until we are
seen no more [x34]

In everdecreasing circles
To the center of the sphere
We move to the middle
To answer the riddle
And finally disappear

In everdecreasing circles
We spiral to the core
We move to the middle
To answer the riddle
Until we are seen no more
In everdecreasing circles [x7]
