Investigate what your ancestors left you
A wreath, a God and belief in slavery
You fight away this monochrome pact
It's legal action, it's matter of fact
(That)

The Romans hailed a Sun God
The Christians tortured Jews
Together is that belief for you

Walkabout the rock
It may give you a few answers
Don't lie about the rock

Walkabout the rock
It gives me all the answers
Don't lie about the rock

What better way to conquer a nation
Than steal away its spiritual release
When after all the door is left wide open
Hey men of God, say what do you preach?

Walkabout the rock
It may give you a few answers
Don't lie about the rock

Walkabout the rock
It gives me all the answers
Don't lie about the rock

So maybe it's dream time
Close your eyes and drift away
Dream time
Close your eyes don't fight it

You believe what you believe
Without question, without waste
You inoculate the children
Against their reason, against their fate

You pray for mystical decisions

Through the gates
We are inside, this is our final state

Walkabout the rock
It may give you a few answers
Don't lie about the rock

Walkabout the rock
It gives me all the answers
Don't lie about the rock

Dream, dream time
Close your eyes and drift away
Dream time
Close your eyes

To every man a kingdom
For the better of man's estate
Dream time

You believe what you believe
Without question, without waste
There's no dream time

Walkabout the rock
It may give you a few answers
Don't lie about the rock

Walkabout the rock
It gives me all the answers
Don't lie about the rock
