"Forget You"

Visit "[Forget You](#)" on MotoLyrics.com

I can remember
I can remember you
When we were angels
When we were angels too
Rays of light from the setting sun
Better than with you than with anyone
Over and over it plays in my mind
Over and over and all the time

Forget
Forget you

I can remember
I can remember you
How you were evil
How you were evil too
Hust like an insect eating it's birth
You found out the truth was
You needed the hurt
Poison saliva exchanged with a kiss
Tonguing the devils own mistress

Forget
Forget you (how could i)
