theres a war going down between my brothers tonight

I dont want no war going down tonight

civilization ha I call it as I see it

I call it bullshit you know I still cannot believe it

our evolution now has gone the way of hate

a world evolved resolved in this stupid fate

stop this war

all so different yeah I say were all the same

all caught you know in the division game

self destruction fast impending like a bullet

no one can stop it once its fired no one can control it

stop this war

a final word, wait it's not a call to action

we aint no sect we aint no fucking faction

unity unity youve heard it all before

this time its not exclusive we want to stop a war

unity as one stand together

unity evolutions gonna come
