There is no real way out, no I'm still in here fighting
I've never been losing forever, destroying myself in
spite
Grid my teeth
Breaking myself
I nurtured a snake

So keep your misery and well-put sympathies
I am not your alibi (I am not the one)
God knows I loved you so
There's nothing left

Here take it all, I'm so disgusted I can't take no more
Keep it all - good fucking riddance
I hate myself just fine alone
I know how to hold my own
I gave you my all

So keep your misery and well-put sympathies
I am not your alibi (I am nit the one)
God knows I loved you so
There's nothing left

With everything you said
Every time you lied
Every single step
I knew you'd come around and show me who you are
Leave me with the scars
I've been waiting for you

With every single lie
The stains you left behind
I'll never close my eyes again

You're nothing
I am not your alibi
God knows I loved you so
There's nothing...
