Goodbye, I hope we meet again
Goodbye, is this how it's got to end?
But we've come to the end of our road together
Made a stand that's gonna last forever
Brother tell me, what you're gonna do?

Will you take the high road?
Will you take the low road?
Will you take the fast train out of town
To get back home?

Will you take the high road?
Will you take the low road?
Oh brother
You're out on your own

Goodbye, is this how it's got to be?
Call by we can rap over tea
We've come to the end of our road together
Made a stand that's gonna last forever
Brother won't you tell me, what you're gonna do?

Will you take the high road?
Will you take the low road?
Will you take the fast train out of town
To get back home?

Will you take the high road?
Will you take the low road?
Oh brother
Now that you're out on your own

We learned a lot from each other
That's how we came to be brothers
Brother won't you tell me what your problem is

Oh and don't waste your time on hate
Can be used in better ways
Remember the time and better days

Goodbye, I hope we meet again
But the good times will always remain

But we've come to the end of our road together
We made a stand that's gonna last forever
Brother tell me what you're gonna do

Will you take the high road?
Will you take the low road?
Will you take the fast train out of town
To get back home?

Will you take the high road?
Will you take the low road?
Oh you're out on your own

Now will you take the high road?
Or will you take the low road?
The fast train out of town
To get back home

Will you take the high road?
Will you take the low road?
Oh brother, you're out on your own
Out on your own, out on your own
Out on your own
