

## The Free "Loveletter From Space"

Visit "[Loveletter From Space](#)" on MotoLyrics.com

You're sitting on the moon a million miles from here  
It seems so far but in my heart I know you're near  
And when I'm all alone I'm wishing you were here  
And so I call your name, so I call your name  
So I call your name

With your light you shine the message  
The loveletter from space.  
And it says I love you  
And with my light I shine the message  
The loveletter from space.  
And it says I love you too  
Dam da da da di da di  
Dam da da da di da di  
Da da da da di dam...

I'm sitting here alone the million miles from you  
If I had a rocket I would flying to the moon  
And everyday I hope you'll come back to me soon  
And so I call your name, yeah I call your name  
So I call your name
