People gonna talk about the things you do They're gonna talk, be it lie or true Night or day, day or night They're gonna talk be it wrong or right

People gonna talk about you anyway They're gonna talk no matter what you say Night or day, day or night They're gonna talk be it wrong or right

It seems they've just got to Yakety yakety yak Though they know best not to The minute you turn your back

People gonna talk until they're satisfied They're gonna talk until they make you cry Near or far, here right now They're gonna talk 'cause that's how people are

It seems they've just got to Yakety yakety yak Though they know best not to The moment you turn your back

People gonna talk until they're satisfied
They're gonna talk until they make you cry
Here right now, near or far
They're gonna talk 'cause that's how people are
They're gonna talk 'cause that's how people are
