Ten Demo)

Thieves in the window

Trouble down the hall

The resin white ceiling

Blood, dripping, flows

Out on the front line

Preachers sweep the earth

Out on their backsides

With nothing in common, with no problem

She's just a girl...

Just...just a girl, yeah...

Just one time around

She has little chance to make good

Distance of her lie

Decided in the womb

Burning fires

See the red, true beliefs

This maid in progress

Betrayin' your mother's need for a shelter

Oh, just a girl...

Just...just a girl

Just one time around
She had little chance to make good
Treats them now, she's young
But it can be taken away
Just one time around...can be taken away
We all make mistakes
Hush my baby...don't you cry...
You're my little alibi
Oh baby, please...I need some sleep
Hmm, now be taken
You with me
Just a girl (5x)
Just a kid, yeah
