you gotta roll when you think it won't roll no more  
you gotta pump it up when it's flat  
you gotta check it where the rubber meets the road  
if it's a geo or a cadillac  
you can't whine when the siren finds you  
you can't fake it when the fuel is gone  
but you just might find if you limp it to the line  
the line ain't so long, so long

I had a girl, had a girl, such a beautiful girl  
I had her love me for awhile  
she was mine, she was mine, she was really fine  
she used to treat me like a baby child  
she loved me like a rainbow, she loved me so strong  
then I went away for a minute and a day  
it was one minute too long, so long

honey you got time to fix what is broken  
don't be afraid to get rid of what's wrong, so long

I wanna go, wanna go, on a mystery trip  
I wanna cruise down the miracle mile  
I wanna push it to the limit in dead man's curve  
make jump, make it squeal, make it shimmy for awhile  
oh yeah! my baby  
now would you wanna come along  
your daddy might say that you're slippin' away  
but I know you're already gone, so long

long, long, long, long  
so long
