

## Saddle Club, The "Together we are"

Visit "[Together we are](#)" on MotoLyrics.com

Nothing's gonna stop us now  
Cuz together we can do no wrong  
Nothing's gonna hold us down  
When we're together where we belong  
Together, where we belong

Together we are, brighter than the sun  
Together we are, the calm inside the storm  
And we are, nothing without each other  
And we are, together where we belong

Can't wait for the sun to rise  
Cuz tomorrow is open wide  
Can't wait for the next surprise  
I can do anything with you by my side  
Together, side by side

Together we are, brighter than the sun  
Together we are, the calm inside the storm  
And we are, nothing without each other  
And we are, together where we belong

Together we are, everything we need  
Together we are, more than the sum of us  
And we are, nothing without each other  
And we are, together where we belong

Together we are, brighter than the sun  
Together we are, the calm inside the storm  
And we are, nothing without each other  
And we are, together where we belong

Together we are, everything we need  
Together we are, more than the sum of us  
And we are, nothing without each other  
And we are, together where we belong  
Together, where we belong  
Together, where we belong
