People like you and people like me
Need somebody to lean on if we wanna stay free.

We'll come together
and maybe we'll see -

People like you and people like me.

Ah

you - people will say

We should all live together and I pray for that day.

Some are lonely and dissatisfied

We will hand to the man who is standing by your side.

People like you and people like me.

Many

many agree -

And they keep on amusing all those people in me.

And there'll be an end an end to it all

If you just stop to listen and hear your brother's gone.

People like you and people like me.
