Pandemonium

She's got a million faces all faded into one
She'll tear your heart out watch out, she has just begun
Fearing the night might get you through it
Sleep with a light

Blue eyes can be deceiving all painted up in black
One look is penetrating. One cannot fight back
She'll try to take the life you've been given
Just stay awake

Pandemonium is raging in her mind
Locked up inside till the planets realign

Life is so time consuming with strings around your
neck
She'll get the devil's ways once you are a wreck
A little tongue your only desire
That can't be wrong?

Pandemonium is raging in her mind
Locked up inside till the planets realign

Fearing the night might get you through it
Sleep with a light

Pandemonium is raging in her mind
Locked up inside till the planets realign
