we got the rally on the run
now people show us something we cant do
got the message, got the gum
we're not the kinda girls you give in to

so we
say its alright
say it all the time
say its alright
say it all the time

we got the people in the know
we got the guarantee to get jumping
got the feeling, got the flow
so now we really talk about something

and we
say its alright
say it all the time
say its alright
tripping on the line

going for the distance
going for the speed
going for the motion
but we never know what's real

across the divide
never hide
til they wanna set you free.

we put the meaning in the word
we put the fire in the connection
got them bringing on the turn
and never take a different direction

now we
say its alright
say it all the time
say its alright
say it all the time

we got a million on the line
we got the kinda thing you can't let go
made it better by design
and set the strategy from the get go

now we
say its alright
say it all the time
say its alright
tripping on the line

going for the distance
going for the speed
going for the motion
but we never know what's real

a-cross the divide
till they decide
if they're gonna set you free.

lets go!

say its alright
say it all the time
say its alright
say it all the time
going for the distance
going for the speed
going for the motion
but we never know what's real

a-cross the divide
till they decide
if they're gonna set you free
