What the fuck have I done to this planet?
Corrupted by religion and lobbies
Deny all their values!
Dysfunction of politics
The system denial
Aggression and anger
Aggression inside my head

Today another bullet found me
I just can't get it out of my head
Fucking parasite get of my back you bore me
Is this the worst picture of my reality?

I can't stand the situation no more
Purified of sins exorcised of demons
New politicians breed so new world order
I will wash my hands today

What the fuck have I done to this planet?
Corrupted by religion and lobbies
Deny all their values!
Dysfunction of politics
The system denial
Aggression and anger
Aggression just please make it stop!

But tomorrow when I wake up
There will be a brand new happy life for me
Tomorrow I'll wake up in a perfect day
And I'll be alright
