And I will hold on my soul. And I will let it take control.  
Can you hear me now? Then move your problems out  
the way,  
So we can move you tonight.  
You're piling up in circles and I'm on top.  
All I need is a one on one with you, to explain how I  
want the whole  
world to see what we can be.  
At the same time, there's no way I'll let you disgrace  
my family name.  
Could you agree now you're in my town? This isn't  
about you,  
But recognize who you fought through. Through the  
pain, so much to gain.  
All this time and now you're on my side because I was  
the one to  
hold on my soul, and I will let it take control.  
Here's something you don't know:  
Your inspiration has taken me this far.  
I'll find a way to keep you next to my heart!
