"One Day"

Visit "[One Day](#)" on MotoLyrics.com

We used to live by the moon
Walk free through the earth and the trees and gather
our food,
Live with courage plantin' the seeds that are grown by
the sun,
Sow the corn and reap the rewards and feed everyone.
No words explain exactly how it feels,
To come under the gun of greedy men,
But once they target you it's as good as done,
They come surround you, you've got no where to run
They come surround you you've got no where to run,
They come to take your home and use their gun.

[CHORUS]

One Day We Will Know What Freedom Is.
One Day We Will Know What Freedom Is.

Now brothers turn on brothers,
Leaders on their own,
And they cant be working for the people if they benefit
alone.
Still there's men and women who will follow in this age
of self destruct,
Take the land and miss use and abuse until
everything's fucked up.
This system's forced on you to bring you down,
It would be wise of you to stand your ground,
It seems their greed just keeps them wantin' more,
Look at all the pain they start and shit they've caused
Look at all the pain they start and shit they've caused,
Look at all that pain they start to stop you all.

[CHORUS]
