Had it out with the crazy ones
I have lost you

Love spread like fog
For me, quietly
And I found a swan
Hiding on your door
The grass is green
And in between
The total health of everything
Animal, animal, animal

Had it out with the crazy ones
I have lost you
had enough with his sharks and his fawns
I have lost you

Have you seen

Have you seen godspeed, goodluck
Ashamed that I can get enough
Have you seen this ideal dream
Of what on earth love's supposed to be
I cant tell, this mind's been changing
God I cant get my mind around
I can't tell, he's winning right?
You looked so beautiful that night

I can't travel this heart of mine
Miles I've wasted
And known it all for a long, long time
