### "Chant the Anthem"

Visit "[Chant the Anthem](#)" on [MotoLyrics.com](http://MotoLyrics.com)

[Intro: ShoGun Assason, (Islord)]

Let that beat go, what, what  
Chant the fuckin anthem, we got the Remedy  
For all you motherfuckerin ails  
(What, what, what, what) Word up, chant the anthem  
Chant the anthem, chant the anthem, chant the anthem  
We got the Remedy for all your fuckin ails  
(Yo, what, what, what, what) Chant the fuckin anthem  
(We got the Remedy with the sword  
For all your fuckin ails, yo, yo {Killarmy}  
Razor Sharp, yo, yo)

[Remedy]

The laws of physics keep us ground to the solar  
The soul controller, secondary to the power of polar  
Magnetic tendencies with mobile independancies  
Essentially balls in energy, mankind yearns for Remedy  
Rival countries declare war for control of the land  
Money and power, man, proceeds to kill man  
By the hour, daily mixtures, predictions by biblical  
scriptures  
Yo life's a nonfiction, that's your picture that hits ya  
Vision quest, the true test of fruits, the nature's  
temptations  
Where man meets the devil and the greed of the nation  
There's no excuse for the iducin, of Lucifer seducin' ya  
Abuse of the mental's defusin ya, confusin ya  
Inconclusiveness, thought can't be taught with no  
nucleus  
There's truth in this, truth master, self-exclusiveness  
For glory, the blood of a million spilled, a long stories  
It suits ya, Remedy forever givin knowledge for the  
future

[Beretta 9]

There's no devil without the God, no time's without the  
hard  
No struggle without the strive, we all fight to stay alive  
In this wilderness, who missin off, my nigga's soul leak  
with the safety off  
I observed through the corner of my eye, pull the five,

most is blind  
Falling victim to the time, there's no shit without the  
crime  
My silent weapon is my mind, soldiers come forth and  
shine  
Together as one mind, united we stand, so let us all  
combine  
Together as one mind, for once scrape the nine  
Then culturally refine, make notes to waste no time,  
niggaz

[Chorus: ShoGun Assason]  
Chant my anthem, chant the anthem, chant my anthem  
We got the Remedy, we got the Remedy for all your  
fuckin ails  
Chant the anthem, chant the anthem, chant the anthem  
We got the Remedy, we got the Remedy for all your  
fuckin ails  
Chant the anthem, chant the anthem

[Solomon Childs]  
Mr. Miraculous, super spectacular  
With more gun blade then Bronx Tale, so you can call  
the kid Sonny  
You little nigga, mad, cause you gettin' slow money  
Brace yourself, as be Wisdom Allah Rule  
Megs chew through, gorillas on the move  
Reflect when I react, fifty caliber, kept slumped on  
I'm takin' it all, from your team and your bottom fronts  
It's music for niggas who drive drunk...  
You a duck, standing in front of your cell  
Holdin' your C.R.E.A.M. cuff, what will you lose?  
Cash, and you ain't even gettin' high  
Runnin' to the bubble and the pressure applies  
Sing' ain't lie, glitter like showcase emeralds  
All generals are soldiers, but all soldiers ain't generals  
Stand close enough to smell the espionage, God  
With shells that solve like Capri's on homicide cases  
I could see it in your eyes, you all up in the wrong  
places

[Chorus]

[ShoGun Assason]  
Yo, yo, I sling war slang like cocaine  
Verbal dope that numbs your brain, like a shot of  
Novocain  
In your death you will feel no pain  
I should teach you with my sword, and the tip was  
poisonous  
Snakes speak lies and their words is venomous, Wu

hits come continuos  
So I don't give a fuck about '97, ain't feelin this  
See what I'm revealin is the truth, and actual facts be  
the proof  
The youth be the fruits, and the elders be the roots  
I stand solid, on the firmament, this black man be the  
dominant intelligence  
These be the word's from my testament

[Remedy]

Yo, yo, against the odds, devil with the gods  
Fertilize the eggs, spread and plant new pods  
The savior, three sixty degrees from the alpha to  
omega  
Walks with the blue light saber, Remedy know the  
enemy  
Ancient mathematics from the mentally headstrong  
Physically and mentally, mind in meditation  
Constant elevation, resistin temptation  
Hidden master plans of world domination

[Chorus to fade]
