

## High Court, The "2 Much Love For 1 Woman"

Visit "[2 Much Love For 1 Woman](#)" on [MotoLyrics.com](http://MotoLyrics.com)

I've got a reason for the way I've been acting tonight.  
I'm unexcited cause you're so inclined to invite,  
invite me to rock your room, we're the legion of doom.  
You're the girl, we're the bad guys.  
Where is your groom?  
Spending time ripping lines off a stripper's behind!  
You wait for you man but he's out every night.

So, tell me what you're doing here.  
You're on dangerous ground, no matter how safe you  
may appear.

I heard a rumor that you'll try to deny,  
you find comfort in the company of multiple guys.  
Good or evil, well, you just can't decide.  
So tonight let's see what happens when you give us  
both a try.

So, tell me what you're doing here.  
You're on dangerous ground, no matter how safe you  
may appear.  
You're on dangerous ground.

You wanna run with the big boys, honey?  
We don't have the time if you don't have the right state  
of mind.  
Get down or lay down, there'll be no messing around,  
you're wasting our time now.

So, tell me what you're doing here.  
You're on dangerous ground, no matter how safe you  
may appear.

Flirting like hell won't peel you out of your shell,  
you've got a blurry perception of the words that I sell.  
And now I'm hazy, or is this subject too wild?  
You're the bridge between intensities, you're  
connected in style.

You can't decide but you won't run and hide.  
You can't decide but you won't run and hide.

You can't decide but you won't run and hide.  
You can't decide but you won't run and hide.

Now, you're on dangerous ground.  
You're not safe here, I thought you've figured it out by now.

So, tell me what you're doing here.  
You're on dangerous ground, no matter how safe you may appear.  
Tell me what you're doing here.  
You're on dangerous ground, no matter how safe you may appear.  
Tell me what you think you're doing here.  
You're on dangerous ground, no matter how safe you may appear.  
You're not safe here.
