Reasons, oblivious untrue, always,  
And I'm still taking the time to find who,  
is everything that makes me feel alright,

I'll stay lo,  
As the moment comes to cut you off ,  
Is that what you wanted to hear?  
Selfish and silent,  
And nothing can calm my jealous fear,

I'll stay lo, take aim at the soft and tender,  
Cause staring's not supposed to hurt,  
Avoiding what truly matters,  
For better or for worse,  
Recall, infatuation from a distance,  
And I'll take note,  
To exploit our only weakness,  
And turn it into regret,  
But seeming so much different,  
You never gave it time to work,

But now I'm facedown unspoken,  
My chest ripped right open,  
From sunrise to nightfall,  
I need a place that I can hide out,

I'll stay lo,  
As the moment comes to cut you off ,  
Is that what you wanted to hear?  
Selfish and silent,  
And nothing can calm my jealous fear,  
I'll stay lo,  
Take aim at the soft and tender,  
Cause staring's not supposed to hurt,  
Avoiding what truly matters,  
For better or for worse,
