

Higher, The "Weapons Wired"

Visit "[Weapons Wired](#)" on MotoLyrics.com

We're always looking but we're never moving our feet
That's where the problem repeats itself
And that's where she found someone else
And now the party's started and there's no one left to
retrieve
What she's taken from me that girl
And I just want her for myself

And it's so overbearing
As I watch her move so steady
And she won't make her body stop
No, she won't let her body stop

I've been standing alone and you've been dancing
tonight
away (dance tonight away)
You've been moving so slow,
I wanted to move the same way, oh yeah (move the
same way)
People like us use their bodies like exploding weapons
wired
Never excusing while we're standing as we dance
tonight away, oh yeah

Take apart their academy by begging for attention
Cause I'll show you loyalty, but lust is hard to mention
So baby just stare at me, encourage to walk closer
And I watch the world freeze as I'm hit with the cold
shoulder
As I'm hit with the cold shoulder

I've been standing alone and you've been dancing
tonight
away (dance tonight away)
You've been moving so slow,
I wanted to move the same way, oh yeah (move the
same way)
People like us use their bodies like exploding weapons
wired
Never excusing while we're standing as we dance
tonight away

Believe in what you want again
Just don't let it take you
And just don't let them take you

Cause we're always looking but we're never moving our
feet
That's where the problem repeats itself
And that's where she found someone else
And it's so overbearing
As I watch her move so steady
And she won't make her body stop
No, she won't let her body stop

I've been standing alone and you've been dancing
tonight
away (dance tonight away)
You've been moving so slow,
I wanted to move the same way, oh yeah (move the
same way)
I've been standing alone and you've been dancing
tonight
away (dance tonight away)
You've been moving so slow,
I wanted to move the same way, oh yeah (move the
same way)
People like us use their bodies like exploding weapons
wired
Never excusing while we're standing as we dance
tonight away

(I've been standing alone and you've been dancing
tonight away)
As we dance tonight away
(I've been standing alone and you've been dancing
tonight away)
As we dance tonight away
