Verse 1:

As I watched the tail lights disappear
Suddenly it got real lonely here
I know the words I could have said
To make her turn around
But a lot of good it's gonna do me now

Verse 2:

I could have started with I'm sorry
And really meant it from the heart
The rest would have been easy
Together in the dark

Verse 3:

We could have found that old time feeling
That we lost somewhere somehow
But a lot of good it's gonna do me now

Verse 4:

Still thinking about the things I could have said
And looking at her picture by the bed
I realized just what I've lost as I pulled the covers down
But a lot of good it's gonna do me now

Verse 5:

I could have told her I was sorry
And really meant it from the heart
The rest would have been easy
Together in the dark

Verse 6:

We could have found that old time feeling
That we lost somewhere somehow
But a lot of good it's gonna do me now
A lot of good it's gonna do me now
