What does it mean If I don't want to sing If I don't feel a
melody In my heart right now What does it mean When
you talk that way When you look that way At me

Chorus: I need a light A beacon of some kind I need a
light To show me where I'm going I need a light A
signal fire or something To show me my way home

What does it mean When the signs point that way When
the signs point the wrong way From where I'm goin'?
What does it mean When I won't grow up to be The
person everyone's Expecting of me?

Chorus: I need a light A beacon of some kind I need a
light To show me where I'm going I need a light A
signal fire or something To show me my way home

What does it mean When I can't feel a thing From all
the days That pass by me What does it mean When I
can't find the answers That I need To set me in line?

Chorus: I need a light A beacon of some kind I need a
light To show me where I'm going I need a light A
signal fire or something To show me my way home
