Mercedes' tracks in every land,  
they cover every road and street!  
Without Mercedes cars on hand  
a business wouldn't be complete.

Fly Lufthansa and get much more:  
Relieve the tension, ease the pace.  
Take off the moth in Singapore!  
Good Marks are honored everyplace!

A Volkswagen for everyone  
throughout the north, the south, and west!  
Where inexpensive autos run  
the people's car is always best.

In fields like iron and pharmacy  
we've earned a name for goods of class,  
With Krupp's and Bayer's industry,  
And crematoria and gas!

Our ovens are built with quality:  
They'll never leave a trace of meat.  
The experts of the world agree:  
Our furnaces cannot be beat.

(new melody)  
It is amazing what our people do:  
Obedient, industrious, persistent!  
Though Goethe's countrymen have faults, it's true,  
the output of our ovens is consistent!
