Black magic, black magic
You used black magic when you took hold of me
You told me that your love was true
All the time you were castin' a voodoo, black magic
Will you ever let me, will you ever set me free
Black magic, black magic
You used black magic when you made me want you so
But I know you used a mojo hand
With powers to hoodoo a mojo man
Black magic, will you ever let me, will you ever set me
free

Hocus pocus and my love was just for you
Alakazam, now you leave me feelin' blue
Black magic, black magic
You used black magic when you took hold of me
You told me that your love was true
All the time you were castin' that voodoo, black magic
Will you ever let me, will you ever set me free

Hocus pocus and my love was just for you
Alakazam, now you leave me feelin' blue
Black magic, black magic
You used black magic when you took hold of me
You told me that your love was true
But all the time you were castin' that voodoo, black
magic
Will you ever let me, will you ever set me free
Will you ever let me, will you ever set me free
Will you ever let me, will you ever set me free
